Open Ended Feedback By Question

What aspects of this course were most beneficial to you?

Comments
Diving into the nitty gritty of various programming languages has deepended my knowledge of the various types of programming languages and has helped me in my career already.
Worksheets were good
The new programming languages were learnt and learnt the new concepts from the known languages.
Assignments and course work
.

What suggestions do you have that could help improve the course?

Comments
I wish that the course had more in class engagement. The professor did his best to engage the people who attended the class in person or online but there were often only 1–5 people attending live.
Watching YouTube for understanding the coursework not at all interactive. Would rather prefer live lecture where we would go through the coursework
More explanation on the tough and hard to understand concepts.
.

Other comments?

Comments
I was actually surprised by how much I learned and enjoyed the class. I thought it would be really boring, but that's the magic of an educational curriculum, isn't it? I'm fascinated by Scala and I would really like to build something in my professional career with it. Additionally, I've always disliked JavaScript but now that I'm a little more familiar with how it works, I dread working with it less.
None
.

What are the major strengths and weaknesses of the instructor?

Comments
Professor Rielly is very knowledgable in his domain. I think he can get into the weeds with the technical details which can be difficult to follow, but he is more than willing to stop and go over it with engaged students.
Great explanation but should take some time to explain the hard concepts.
.

Do you have comments on the grading procedures and exams?

Comments
No
.
